

Travel and Hospitality Identity Management

Deliver personalized, omnichannel guest experiences to help drive bookings and business value.

Travel and hospitality brands today face a number of challenges, including competitive pricing pressures, web-based private accommodation and transportation services, and global security threats.

Loyalty and trust are flowing to those companies that best understand their customers and deliver highly personalized, engaging, and satisfying experiences. For hotels, airlines, and cruise operators looking to streamline guest identification and account management, a customer identity and access management (CIAM) solution is key to boosting bookings and brand loyalty.

Identity Cloud provides real-time identity management, identity security, and identity activation solutions that enable seamless and secure experiences anywhere in the traveler's digitally connected world, while providing brands with deep customer insights.

ENGAGE TRAVELERS

Easily acquire and recognize customers across all your digital properties with an omnichannel registration and access management solution that can help increase conversions and improve guest experiences.

- Simplify guest registration with social login and single sign-on (SSO)
- Achieve a 360-degree view of travelers with demographic and behavioral data
- Build better relationships with customer preference management

GAIN DEEPER CUSTOMER INSIGHTS

Combine demographic data with behavioral and personal preference insights on consumer interactions with your travel and hospitality brands. Managing identities centrally creates a richer view of customer data that can increase revenue opportunities and brand loyalty.

- Improve guest experiences with consumer identity data
- Gain new insights on travelers from reporting tools and segment data
- Optimize for conversions with the help of customer journey analytics

CONNECT YOUR TECHNOLOGY STACK

Identity Cloud enables centralized, usable, and secure customer data for travel and hospitality brands. We work with you to integrate customer profile data into your technology stack and provide real-time traveler insights to your entire ecosystem.

- Simplify guest profile management with a platform that integrates seamlessly with your technology stack
- Share real-time customer profile data with apps and digital properties for personalized omnichannel experiences
- Benefit from a single source of truth for universal guest identity

SECURE YOUR CUSTOMER DATA

Guard your brand's reputation with comprehensive authentication, access management, and data governance features. Identity Cloud adheres to the strictest security and privacy best practices in the identity industry.

- Consent lifecycle management supports General Data Protection Regulation compliance
- Strict data management and scoped access controls reduce risk
- Customer care portal simplifies user provisioning and support
