

Carbon Reduction Plan

Compliant with Procurement Policy Note 006 (PPN 006)

Commitment to achieving net-zero

Akamai Technologies Inc. is committed to achieving net-zero emissions across Scope 1, 2, and parts of Scope 3 (Categories 3 and 8) by 2030. Akamai further commits to achieving net-zero across all of Scope 3 by 2040.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2022

Additional details relating to the baseline emissions calculations:

Scope 1, Scope 2, Scope 3 (all categories)

Baseline Emissions	Total (tCO ₂ e)
Scope 1	62
Scope 2 (market-based)	160,800
Scope 3	308,600
Total emissions	469,462

Reporting year: 2025

Emissions	Total (tCO ₂ e)
Scope 1	70
Scope 2 (market-based)	173,000
Scope 3 (Cat 1-8, & 13)	180,350
Total emissions	353,420

Emissions reduction targets

In order to continue our progress to achieving net-zero, we have adopted the following carbon reduction targets.

- **Target 1:** Reduce 100% of our combined Scope 1, 2 (market-based), and 3 (Category 3 and 8) absolute emissions (compared with our base annual inventory) by 2030.
- **Target 2:** Reduce 100% of our combined Scope 1, 2 (market-based), and 3 absolute emissions (compared with our base annual inventory) by 2040.
- **Target 3:** Reduce 100% of our combined Scope 1, 2 (consequential-based), and 3 (Category 3 and 8) absolute emissions (compared with our base annual inventory) by 2030.

Carbon reduction projects

Carbon reduction initiatives

The following environmental management measures and projects have been implemented since 2015 and will be in effect when performing the contract.

- Tier 1: High-Impact VPPAs
 - Where: Deregulated markets (such as the U.S., Europe, Australia, and Japan).
 - Action: We sign long-term contracts to build new wind/solar farms. This is our preferred method for high-volume load coverage.
- Tier 2: Direct Supplier Engagement
 - Where: Colocation facilities.
 - Action: We leverage our transparency clause to push data center partners to procure renewable energy on our behalf, bundling it directly into our service contracts.

The carbon emission reductions achieved by these schemes equate to the following progress against the baseline. For more information, please visit: <https://akamai.com/sustainability/renewable/>.

Target	tCO ₂ e Reduced	% Reduction Against Baseline
Target 1	181,970	42%
Target 2	182,740	34%
Target 3	271,970	44%

Future carbon reduction initiatives

In the future we may implement further measures such as:

- Tier 3: Market-Based Certificates
 - Action: Where direct procurement is impossible, we procure unbundled energy attribute certificates (EACs). However, we apply a quality filter: We only purchase certificates that offer reliable traceability (e.g., Green-e, I-REC) and meet local compliance rigor.
 - Where: Regulated or emerging markets with limited infrastructure.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate government emission conversion factors for greenhouse gas company reporting, including but not limited to [UK government annually published conversion factors](#).²

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.³

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:

David Aitken
Managing Director, Akamai International BV
