

More is riding on your digital experiences — and images — than ever before

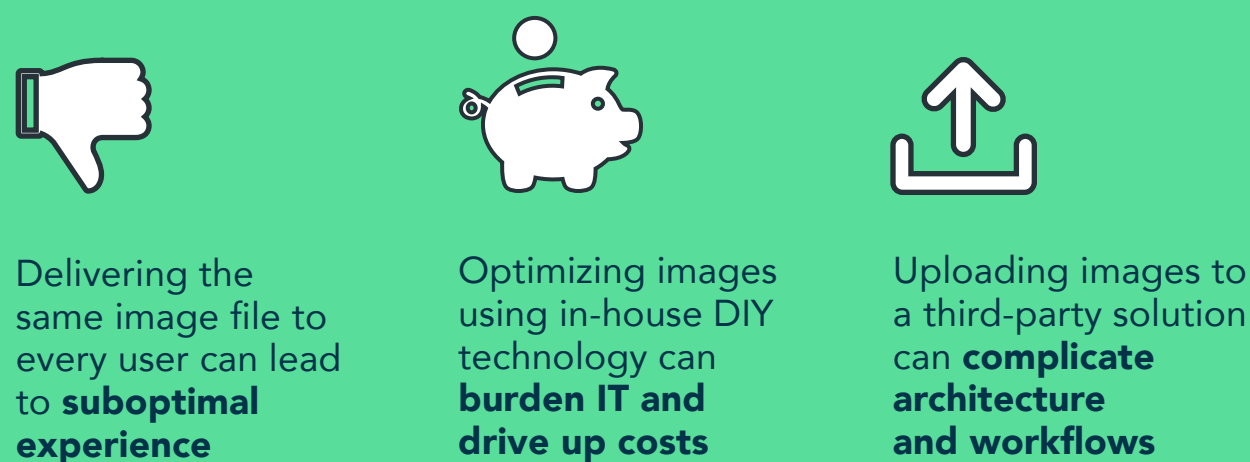

As consumer expectations grow, so do the complexities of delivering high performing websites and apps

As a result, businesses are struggling to deliver the optimal digital experience

Common approaches are expensive and often fall short

You can silence the debate over image quality with Cloud-Based Image Optimization

- ✓ Integrate optimized images directly into sites and apps.
- ✓ Manage one image and automatically optimize the rest.
- ✓ Eliminate cost and effort to create, store, and serve multiple image derivatives.
- ✓ Drive higher engagement and better business results with faster-loading pages.
