Mega-Attacks Down

The largest attack came courtesy of those seen
100 Gbps per second (Gbps), and comprised
attackers using PBot to create a mini-DDoS botnet
attack. This was the largest DDoS attack seen this
quarter.

Repurposing Mirai and PBot

PBot was repurposed to attack its target with hundreds,
rather than thousands of compromised nodes.
This botnet was used to attack its target with
hundreds, rather than thousands of compromised nodes.
This quarter, a financial organization
was targeted in a 75 Gbps attack, bringing a +44% increase.

DDoS ATTACK TRENDS

STATE OF THE INTERNET SECURITY Q2 2017

Clean networks have 1%–5% NXDomain responses, while infected
networks have 15%–33% NXDomain responses.
(this response code implies a domain does not exist)

As the world’s largest and most trusted cloud delivery platform, Akamai makes it easier for its customers to provide
the best and most secure digital experiences on any device, anytime, anywhere. Akamai’s massively distributed
platform is unparalleled in scale with over 200,000 servers across 130 countries, giving customers superior
performance and threat protection. Akamai’s portfolio of web and mobile performance, cloud security,
enterprise access, and video delivery solutions are supported by exceptional customer service and
